### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Downes (US 6,222,277 B1).

Downes teaches a semiconductor device, comprising (see Fig. 5) a semiconductor die 10 (see column 5, line 4) having a first plurality of electrical contacts 44; a first plurality of conductive bumps 40 wherein at least one bump in the first plurality is conductively connected to at least one of the first plurality of electrical contacts 44; a second plurality of conductive bumps 42, wherein at least one bump in the second plurality is conductively connected to at least one of the second plurality of electrical contacts 44; and wherein each of the bumps 40 in the first plurality of conductive bumps is larger than each of the bumps 42 in the second plurality of conductive bumps.

Concerning claim 15, a method of making a semiconductor circuit, comprising: providing a semiconductor die 10 comprising a first plurality of electrical contacts and a second plurality of electrical contacts 44; conductively connecting to the die 10 a first plurality of conductive bumps 40 wherein at least one bump in the first plurality of conductively connected to at least one of the first plurality of electrical contacts; conductively connecting to the first die a second plurality of conductive bumps, wherein

at least one bumps in the bump in the second plurality is conductively connected to at least one of the second plurality of electrical contacts; and wherein each of the bumps 40 in the first plurality of conductive bumps is larger than each of the bumps 42 in the second plurality of conductive bumps.

### ***Allowable Subject Matter***

2. Claims 11-14, and 16-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The applied reference fails to teach and/or suggest the limitations as set forth in claims 11-14 and 16-20.

3. Claims 1-9 are allowed.

The following is an examiner's statement of reasons for allowance: the applied reference doesn't teach having a conductive path as claimed in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
